

PROFESSIONAL SUMMARY

Graphic Designer with 2+ years of professional agency experience, currently self-learning UI/UX design and actively building product design skills through personal projects. Comfortable in Figma — wireframes, prototypes, and high-fidelity mockups — with a strong grasp of typography, layout, and color systems from my graphic design background. Passionate about AI-powered products and startup environments where I can work directly with founders, learn fast, and contribute to a real product from the ground up.

PROFESSIONAL EXPERIENCE

SISESOFT IT Solutions

Graphic & UI Designer

Aug 2023 – Present | Bengaluru, India

- Designed visual assets, digital creatives, and interface elements for FinTech, EdTech, and SaaS clients across web and mobile
- Supported UI design work including layout, visual hierarchy, and basic interface elements in Figma

Visual Design

- Typography | Color Theory | Visual Hierarchy | Layout Composition | Responsive & Mobile-First Design

AI & Workflow

- AI-assisted design tools for faster creative production | Exploring AI design workflows to enhance output quality

SELECTED PROJECTS

UI/UX — Self-Learning & Projects (Over the past several months, I've been actively learning UI/UX design — studying product thinking, dashboard design, and onboarding flows — and applying it through real personal projects.)

Ask & Learn — AI Education App (My first end-to-end UX project — designed an AI-powered mobile app for students | Full flow: onboarding → question input → AI response → saved answers | Built interactive prototype, tested with real users, iterated based on feedback)

Marketing Website Redesign (Redesigned homepage and key sections applying UX principles: hierarchy, content-first thinking, responsive layout)

EDUCATION

Master Of Business Administration (MBA), Adhiyamaan College Of Engineering

Jun 2024 – Present

Bachelor of Science (Computer Science, Mathematics & Electronics), Kristu Jayanti College, Bengaluru

May 2019 – Jun 2022
